The fourth event in the 2017 Young Motorsport Engineers Skills Development program took place this past weekend at the Aldo Scribante Raceway in Port Elizabeth. The students from the East Cape Midlands College were hosted by the Bateleur Motorsport Team and the merSETA.

The students and their lecturer enjoying a photo session

Lunch and refreshments were provided

Bateleur's Chief Engineer, Alan Kernick sharing some of his many years of experience with the students.

Even the marketing department got in on the act

Thursday was a day of sharing information and the students were given a close up look at the teams sports racing car, whilst being shown some of the many skills required to engineer this type of car by the teams chief engineer Alan "AJ" Kernick. Twenty students took part in Thursday's programme with each receiving a signed certificate of achievement as well as a Bateleur racing cap at the end of the day.

RACE DAY

Seven of the East Cape Midlands College students were nominated to spend the weekend with the Bateleur Team as a part of the mentorship aspect of this programme. They were integrated into the team and got a very hands on experience of just what it is required to work in the highly charged world of endurance motor racing.

At the end of the event each of the seven students were given an amazing gift from the teams associate tool sponsors GEDORE. A fantastic end to a brilliant event with a truly amazing group of young people.

THANK YOU
